

EarthPulse Sleep On Command System

Congratulations on your purchase of the EarthPulse Sleep On Command System. You have made a very wise choice in your purchase of an excellent and profound tool for health. I will keep this note brief as I know reading the manual to get acquainted with the EarthPulse also takes a little time.

Presently, sleep issues are a global issue. Thus, most people purchase an EarthPulse simply to assist them with better and deeper sleep. The EarthPulse will of course function in this way and provide excellent results.

However, some people, after using the EarthPulse for a short period of time, do not immediately attain the better sleep they are expecting so quickly and come to the conclusion the EarthPulse is not working for them. Nothing could be further from the truth! Most people have not studied the numerous clinical reports from scientists around the world regarding the amazing, wide-spectrum benefits of Pulsed Magnetic Field Therapy. Thus, many people think the EarthPulse is just a simple device for better sleep. Better sleep is only one small benefit the EarthPulse provides to its users.

Yes, the EarthPulse in most all cases, will provide deeper and healthier sleep. However, it provides so much more than this. I could write pages, volumes on the numerous and incredible benefits of nourishing the body with healthy pulsed magnetic fields. However, you can easily find valid and impressive scientific research all over the web to verify what I am offering here in regards to the health benefits of pulsed magnetic field therapy.

The reason for this short note however, is at times, customers will not experience the immediate results of better sleep they are expecting and think “the EarthPulse does not work.” This is a highly inaccurate perception. Healing, pain relief and good health can take some time. Because of our modern lifestyle, wearing rubber soled shoes, working and living separated from the Earth’s natural magnetic fields, our bodies have a deficiency of healthy magnetic fields, which need to be supplied for optimal health.

When the first astronauts were sent to the moon, they came back in terrible health with tremendous bone loss. As it turns out, scientists found this was because of a lack of the Earth’s natural magnetic fields. All manned space flights now have pulsed magnetic fields to duplicate those of the Earth!

Consistent use of your EarthPulse will bring the best results. And even if better sleep is not your immediate experience, this in no way means the EarthPulse is not working! Again, time and consistency are very important factors when building health and vitality.

Another critically important factor that needs attention by people all over the world, is to remove all wireless devices from the home! Independent doctors, scientists and researchers around the world have proven with conclusive evidence that wireless radiation from cell phones, cordless phones, cell towers, and wireless internet modems is detrimental to human health. In addition, wireless radiation will throw off the balance of melatonin in the brain. Melatonin is crucial for proper sleep rhythms and overall regeneration of the body. Thus, it cannot be emphasized enough to replace cordless phones with corded phones and plug computers into the modem with an Ethernet cord and to “disable the wireless option on the modem and computer.” This is known as “hardwiring” your computer. Using an Ethernet cord also makes the internet speed faster than wireless.

Many people have cordless phones or a cell phone on their nightstand while they sleep, or even wireless modems located in or near their bedrooms. This is a major factor that is creating sleep issues in people all over the world.

Although the EarthPulse has created highly impressive results for customers all over the world for many years, it cannot be expected to deliver immediate miracles when people are surrounding themselves with wireless radiation from so called modern conveniences. (Although we do receive testimonials that are pretty close to “immediate miracles!”) Some common sense in regards to eliminating wireless devices from the home, along with the correct and consistent use of this excellent EarthPulse system will bring the best results.
